BMMP Vision

The Department of Defense is managed in an efficient, business-like manner in which relevant, reliable, and timely financial information, affirmed by clean audit opinions, is available on a routine basis to support informed decision-making at all levels throughout the Department

(DoD's Response to Public Law 107-314)

BMMP Goals

Goal 1. *Provide timely, accurate, reliable information for Business Management*

1.1 Achieve unqualified audit opinion on 2007 consolidated DoD financial statements

M1.1.1 Percent of identified material weaknesses eliminated for each material weakness category (Notes 1 & 2)

M1.1.2 Number of financial statement line items that have passed the scrutiny of audit

1.2 By 2007, achieve total visibility and accurate valuation of assets to include Operating, Materials and Supplies (OM&S); Inventory; and Property, Plant and Equipment (PP&E) (Note 3)

M1.2.1 Percent of process established for confirming asset inventory and valuation (to include visibility of in-transit assets)

M1.2.2 Percent of confirmed asset inventory and valuation by category

M1.2.3 Percent of asset data providing accurate in-transit visibility

Note 1: Material weakness categories include "Financial Statement Auditor Identified" and "Other."

Note 2: Using a percentage to represent the elimination of material weaknesses may not be appropriate for all categories of weaknesses

Note 3: Property, Plant, and Equipment (PP&E) includes real property; military equipment; internal use software; personal property, and property in possession of contractors

Goal 1. *Provide timely, accurate, reliable information for Business Management* **(Cont'd)**

1.3 By 2007, achieve total personnel visibility to include: military service members, civilian employees, military retirees, and DoD contractors

- M1.3.1 Percent of process established for confirming personnel inventory and tracking
- M1.3.2 Percent of confirmed personnel inventory and tracking by personnel category
- M1.3.3 Percent of personnel data providing accurate in-transit personnel visibility

1.4 Provide DoD decisionmakers timely access to business information

Metrics are in development -- changing approach from “thresholds for each category of data” to a “set of rules” (e.g., current balances updated daily at a minimum)

Goal 2. Enable improved Business Operations

2.1 Adopt the Business Enterprise Architecture (BEA) for acquiring, managing, and providing material and personnel in support of the Warfighter

- M2.1.1 Percent of process established for measuring BEA adoption
- M2.1.2 Percent of processes re-engineered to align with BEA (Note 1)
- M2.1.3 Percent of systems in domain business portfolios that are compliant with BEA (Note 2)
- M2.1.4 Number of DoD systems eliminated from domain business portfolios

2.2 Systematically enable efficiency improvements to DoD business operations

Metrics are in development – changing approach to focus on productivity improvements (e.g., reduced cycle times, reduced resources)

Note 1: This is a leading indicator that measures the degree to which the “to be” environment is defined and aligned with the BEA.

Note 2: This is a lagging indicator that measures the degree to which the “to be” environment is implemented. The “to be” environment is implemented by changing systems and associated business processes to be compliant with the BEA.
